

# THE HARMONY

## No Flip / Single-Sided Design

Superior Hybrid technology pairs body contouring pocketed coils with full perimeter foam encasement, combined with cooling "Gel Visco" memory foam for a harmonious balance of comfort, functionality, and luxury. Waterfall wave pattern cover.

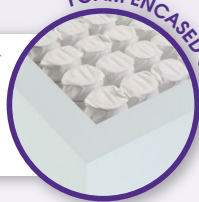

### POCKETED COILS

More "motion separation" than a conventional spring unit. It allows each spring to quickly respond to the movement and contours of your body.

### FOAM ENCASED UNIT

Provides full perimeter reinforcement with high density foam making this mattress more durable. Increases usable sleep space by up to 20%.

### GEL VISCO MEMORY FOAM

A conducive material that reduces heat by pulling it away from the body, so you stay cooler at night. It has a higher support factor than regular memory foam.
