

# THE MONTERREY

## No Flip / Single-Sided Design

Eliminates the hassle involved with flipping a two-sided mattress.

This single sided, extra firm 10" thick mattress delivers exceptional comfort and support with a foam encased, pocketed coil spring unit. It features a luxurious cover with a "multi-needle" quilt pattern designed to secure layers of padding while adding to the overall firmness of this bed.

More "motion separation" than a conventional spring unit. This design allows each spring to quickly respond to the movement and contours of your body.

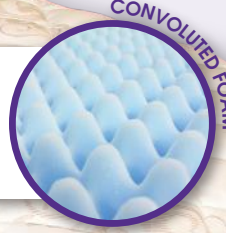

POCKETED COILS

Provides full perimeter reinforcement with high density foam, making this mattress more durable. Increases usable sleep space by up to 20%.

FOAM ENCASED UNIT

Offers increased air circulation, comfort and support for the body.

CONVOLUTED FOAM

Rest Assured.
