

THE VENUS

No Flip / Pillow Top Design
Eliminates the hassle involved with flipping a two-sided mattress.

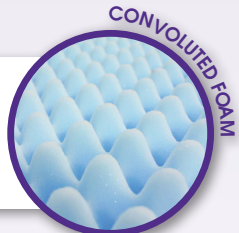

More "motion separation" than a conventional spring unit. This design allows each spring to quickly respond to the movement and contours of your body.

Provides full perimeter reinforcement with high density foam, making this mattress more durable. Increases usable sleep space by up to 20%.

A conducive material that reduces heat by pulling it away from the body, so you stay cooler at night. It has a higher support factor than regular memory foam.

Offers increased air circulation, comfort and support for the body.

Bamboo's soft and luxurious feel combined with its natural, anti-bacterial and moisture managing properties create fabrics that offer a greater sleeping comfort.

Rest Assured.
