

# THE CASABLANCA

**No Flip / Motion Separation Pillow Top**

*Eliminates the hassle involved with flipping a two-sided mattress.*

A pocketed coil spring unit in the pillow top provides motion separation directly at the sleeping surface, and responds quickly to the contours of your body.

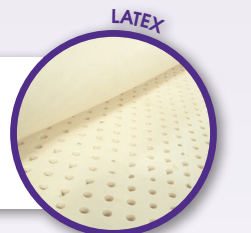

Provides full perimeter reinforcement with high density foam, making this mattress more durable. Increases usable sleep space by up to 20%.

More "motion separation" than a conventional spring unit. This design allows each spring to quickly respond to the movement and contours of your body.

Easily forms to the contours of the body, but not prone to lasting body impressions. A more breathable foam, eco-friendly and naturally hypo-allergenic.

Bamboo's soft and luxurious feel combined with its natural, anti-bacterial and moisture managing properties create fabrics that offer a greater sleeping comfort.

*Rest Assured.*
